

Improve Your Workflow Within Your Infrastructure With **iW FUNCTION FLOW**

Simplify and streamline your workflows with the iW Function Flow and Reader Extensions. Working with and through your existing infrastructure, imageRUNNER ADVANCE's integrated solutions allow users to complete complex work processes with the touch of a customized button. Paperless workflows are also easily achieved, helping you save cost and increase productivity while being easy on the environment.

Advanced made simple for you.

iW Function Flow

iW Function Flow is part of the solutions package designed to streamline workflow and maximize productivity by combining multi-step user workflows into a single button. Users can create workflow buttons from device interface or from PC using iW Function Flow Editor, which can be registered into Quick Menu along with the rest of the end-user quick buttons for easy access.

Direct connection to backend systems

iW Function Flow enables mid-size and large-size organisations to work securely and seamlessly with familiar business applications. You can now convert paper documents into electronic files for immediate distribution or storage, while integrating seamlessly with network repository and content management with deep compatibility, including:

- > Microsoft SharePoint
- > FTP Server
- > SMB Server
- > SMB Indexing

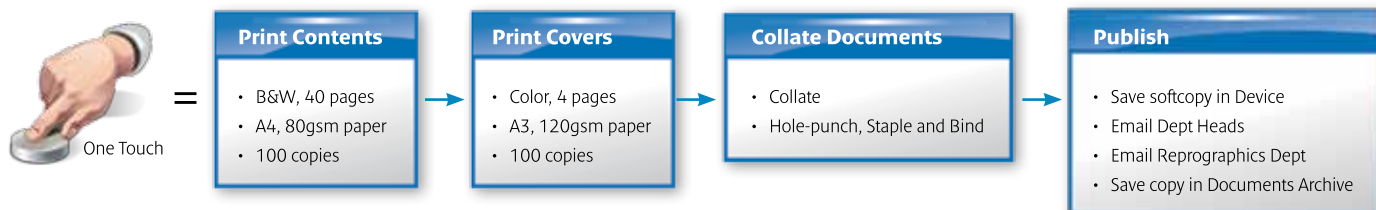

A highly versatile and integrated client-side application

iW Function Flow Editor is a client application that allows you to create and edit workflows integrated with Connectors to designate steps to folder browsing and indexing. Each step is flexible and highly customizable. With iW Function Flow, you will require only minimal development to establish collaboration with external systems.

Complex functions in one simple button

Expand your 'one-button workflows' to include direct connection to back-end systems as one of the output destinations with indexing information. This represents increased productivity with user-specific, personalized workflow connection to back-end systems.

SOUTH & SOUTHEAST ASIA REGIONAL HEADQUARTERS
